SUMMARY

Web Developer with a background in customer service and developed skills necessary to deliver client satisfaction through personable leadership. Recently earned a certificate in full stack development from the University of Pennsylvania, enhancing my skills in responsive web design, JavaScript, React.js, Node.js, and MySQL. Excited to bring my leadership skills into the technology sector and continue leading teams to success.

TECHNICAL SKILLS

HTML 5 | CSS | JavaScript (ES6) + jQuery | Node JS | Express JS | Handlebars JS | Third Party API's + Fetch + JSON | MongoDB + Mongoose | MySql + Sequelize + JawsDB | Git | Heroku

PROJECTS

Wiki Pour | 2021 | GitHub:https://github.com/Israel-Molestina/wiki-pour
URL: https://wiki-pour.herokuapp.com/
- A CMS-style wiki where users can view, add and rate cocktail recipes created by other users on the site. The app follows MVC paradigm in it's architectural structure, using Handlebars.js as the templating language, Sequelize as the ORM and express-session npm package for authentication.
- Built as part of a three person team. Mainly responsible for the models and associations within the database as well as various other bug fixes and improvements to the UI
- Technologies used: JavaScript | Node.js | MySql | Express.js | Bootstrap | Handlebars

Movie Roulette | 2021 | GitHub: https://github.com/Israel-Molestina/Movie-Roulette
URL: https://israel-molestina.github.io/Movie-Roulette/
- A browser-based application that takes in user input and suggests a movie based on that input. The application allows the user to rate, take notes and save the movies they've watched, adding it to a watched movies list. It was built using JavaScript and two API's.
- Built as part of a three person team. Mainly responsible for the backend API calls and data handling.
- Technologies used: JavaScript | External API's | Fetch | Bootstrap

Weather Dashboard | 2021 | GitHub: https://github.com/Israel-Molestina/weather-dashboard
URL: https://israel-molestina.github.io/weather-dashboard/
- A Weather Dashboard App that allows the user to enter a city and displays that city's current and future weather conditions. The cities entered are then displayed on a search list so the user can easily search them again.
- Built from scratch as an individual project
- Technologies used: JavaScript | Luxon | Weather API | Fetch | Bootstrap

EXPERIENCE

Bar Manager | Lead Bartender   2018-2020
The Imperial Life   Asheville, NC
- Compiling and purchasing weekly liquor orders upwards of $2,500
- Integral in event planning and community/charitable initiatives surrounding the bar
- Managed schedule for 8 employees
